Small-to-medium sized businesses (SMB) need training to comply with state and federal laws and build strong management skills. They need on-demand training that is always accessible and easy to implement and use with limited training staff. And, the solution needs to fit into a smaller budget, with the flexibility to change as the business changes and grows.

To meet these demands, SkillSoft offers two options containing our most popular assets: SkillSoft Select and SkillSoft Select Plus. Companies may choose from Office 2007 and Office 2003 versions. In addition, both options come bundled with SkillPort, SkillSoft's hosted learning management system. Or, if you prefer, you can use a third-party learning management system.

### SkillSoft Select

SkillSoft Select includes over 300 courses from our business, IT, desktop, legal compliance and ES&H collections. SkillSoft Select takes the guesswork out of selecting courses and enables learners to quickly and easily find courses that fit their learning needs. Highlights include courses within the following subject areas:

| Courseware                              |                                 |
